Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, 14-25 and 28, drawn to a DNA, a vector, a transformant cell, a transformant plant, a material for the breeding of a transformant plant, and a nucleic acid molecule, classified in class 536, subclass 23.6, for example.
- II. Claims 10-11, drawn to a protein, classified in class 530, subclass 370, for example.
- III. Claims 12-13, drawn to a method for the production of a protein, classified in class 435, subclass 69.1, for example.
- IV. Claims 26-27, drawn to an antibody, classified in class 530, subclass 387.1, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions or different effects. The DNA of Invention I, the protein of Invention II, and the antibody of Invention III are biologically, chemically and structurally distinct from one another and can be used in different methods, such as a hybridization method for the DNA, an immunization method for the protein, and an immunoassay method for the antibody.

Art Unit: 1638

Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method for the production of a protein can be practiced with another materially different product, such as a nontransgenic organism that comprises the desired protein, and the transformant cell can be used in a materially different process of using that product, such as a method of regeneration of the cell into a plant.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, their recognized divergent subject matter, and the requirement for different areas of search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
